

CBE's Grant Services Program

At CBE, we have developed a Grants Program to help you find alternative funding sources for your classroom-based Technology needs. CBE has assisted hundreds of schools, in the New England area and beyond, with finding and winning grant opportunities. Since 2006, we have helped public and private institutions bring in more than \$11 million in federal funds, with an application success rate of over 90%.

How CBE Can Help

- ***Identify Grant Opportunities***

We can assist you in finding appropriate alternative funding sources by performing a needs assessment, researching your organization's demographics, and determining which grants are most appropriate for you.

- ***Qualify and Develop a Competitive Project***

In addition to finding grant opportunities, CBE ensures your submission is competitive and meets all the guidelines. Take advantage of our years of experience and expertise to improve your chances of receiving funding.

- ***Find Grant Writers***

CBE assists you in finding qualified grant writers, with proven track records and experience in the education field

- ***Offer Support During Application and Implementation***

Our grant writers and Grant Services team will work with you to ensure that you have the guidance and support that you need during the grant application and implementation process. We don't believe in identifying a grant and then leaving the rest up to you. We will be there every step of the way!
